

CRANESAFE

APRIL 28-29, 2020
INTERNATIONAL CENTRE > MISSISSAUGA, ON

CONSTRUCTION SITES

are inherently dangerous – and the presence of cranes and hoists only amplifies the risk. Physical safety of workers is just one priority – advances in technology have exposed equipment to malicious hacking, and thrill-seeking selfie takers have made headlines by breaking in and climbing to dangerous heights.

Crane & Hoist magazine, with its media partners at OHS Canada and SP&T News, are proud to present an exclusive day-long forum focused on safety.

Co-located with Partners in Prevention, Canada's largest safety conference and tradeshow has over 4,000 attendees, CraneSafe 2020 is an exclusive opportunity to network with leaders in the crane and hoist industry. April 28-29, 2020 at the Mississauga International Centre.

HEALTH AND SAFETY STRATEGIES FOR CANADIAN HEAVY LIFTING PROFESSIONALS

TOPICS COVERED INCLUDE:

- > Securing construction sites and crane and hoist equipment
- > Cybersecurity – preventing hacking of expensive and dangerous equipment
- > Worker safety – best practices to ensure all your employees go home safe at the end of the day
